

Clipsol

Culminating Activity

I, Julie Timoney,
intend to invent
Clipsol
(Idea or Title)

because people use pencils a lot and
How it will work: you will clip it to your shirt.

The supplies I will need: 3 paper clips,
3 pencils and 3 rubber bands.

Describe the problem you want to solve.

Our problem is that people constantly loose their pencils. So we came up with the Clipsol. You can hook it to your shirt, your pants pocket or your belt you can even hook it where ever you like.

**This step is required.

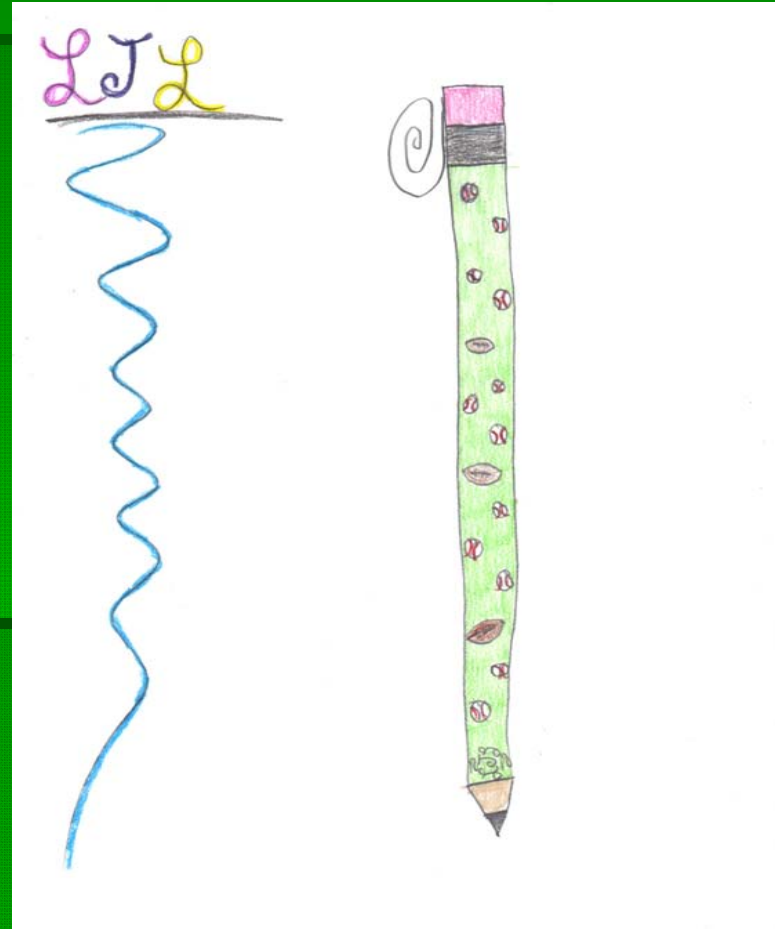

List some possible ways to solve your problem.
Here are some possible ways that we can solve the problem...

You can buy a mechanical pencil, but if you don't like them you can buy the Clipsol.

****This step is required.**

Draw pictures and diagrams to show your invention and how it might work.

**This step is required.

Build your prototype. Write down each step so that you will remember exactly how you built your model.

- ❖ 1st you get a pencil
- ❖ 2nd you wrap the rubber band around the silver part of the pencil
- ❖ 3rd you clip on a paper clip to the rubber band
- ❖ 4th you can design the pencil the way you want to

Perform some experiments to find out how well your prototype works. Write down the results of each test.

We did some “ tests “ on our prototype. Our classmates said that they loved the Clipsol. They said they couldn’t even tell it was there.

People:	Do you think the product will work?	Do you think people will buy our product?	Do you like the product?	Would you buy our product?
Emily	No.	Yes.	Yes.	Yes.
Nick	Yes.	Yes.	Yes.	Yes.
Joe	Yes.	Yes.	Yes.	Yes.

How can you improve your prototype?

Ways we can improve our prototype are decorate it, or make it more attractive.

Give your invention a name and explain why people should buy it.

We named our prototype Clipsol.
People should buy our product
because I could help them not to
loose their pencils.

**This step is required.
